

# After The Master Plan

The master plan process will not end when Roanoke County receives the final document. Our goal is a long-term, executable plan that will shape the park's vision for generations.

- **Continued Community Engagement**

Stakeholder groups formed during the master plan process will continue to play a role in the development of Explore Park as we work to make the vision a reality.

- **Developing Public-Private Partnerships**

The master plan will be used to approach businesses for investment in the park. With an established business plan, Roanoke County will have the tools needed to make the pitch to interested vendors.

- **Seeking Grant Opportunities**

Having a well-defined master plan and park vision makes it easier to apply for regional, state and national grants which will be crucial to Explore Park's development in the near term.

- **Implementation of the Master Plan**

Roanoke County plans to immediately begin using the master plan to guide decision making as we build the park, develop amenities and create community recreation programs.
